2022-2024

## SKILLS

- Java
- JavaScript
- SQL
- jQuery & Bootstrap
- HTML / CSS
- Spring Framework
- REST Architecture
- Data/Class modeling
- Test Driven Development
- Agile Development
- Linux / Windows / iOS

## ABOUT ME

Recent graduate with an AAS in Computer Programming, experienced in Java, REST API, Spring Boot, and more. Proven ability to troubleshoot and resolve technical issues, handle customer inquiries, and provide detailed product and service information. Strong skills in developing and maintaining customer records and knowledge bases. Adept at building rapport with clients, prioritizing tasks, and communicating effectively. Seeking to leverage my technical expertise and customer service skills in an entry-level Java position to contribute to the success of the team.

## EXPERIENCE

### Intern Software Developer

Quicksilver Express Courier

May 2021 - November 2021

- Tasked to refactor the entire customer portal for package requests from jBoss server to Spring Framework
- Learned to stay organized utilizing Trello to log work to be done and work completed for the week
- Handled technical inquiries to resolve employee issues on their systems or company account
- Worked with a team of 5 discussing daily goals over video call every morning

### The Software Guild

Java Apprentice

January 2020 - April 2020

- The Software Guild prepares driven beginners and dedicated students for professional developer jobs in 12 weeks.
- Managed multiple project deadlines through the intensive Software Guild apprenticeship program by communicating effectively with professors and classmates
